Xtruh is an on-demand service application that connects businesses to our trusted tow operators. Our service provides transparency from the time a service is requested, to the time the service is complete and paid.

Our company mission is to streamline the transportation industry by providing our service to businesses needing vehicles moved, to tow operators ready to move them.

Xtruh is currently servicing: Dealerships, Donation Companies, Insurance Companies, Body Shops, and Rental Groups needing transportation assistance from tow operators like yourselves.

Getting a tow is easy. Turn on our free app available on iOS and Android, and get ready to be connected to vehicle suppliers.

Too busy for a tow? No problem, our goal is to add to your business, not make it more complicated. Turning down a tow will not affect your status with us. Tow on your schedule, and start earning Xtruh revenue today!
